

WPS Optimised Line Array – Three-way, passive line array element

Features

- Compact line array
- Scalable resolution for advanced array control
- External, dedicated, multi-channel Class D amplification
- Industry-leading DISPLAY software interacts with DSP for highly-accurate results
- Fast, integral 3-point flying systems for up to 16 enclosures
- Side and rear handles for ease of handling and setting splayangles
- 100° horizontal constant directivity pattern control

Applications

- Touring sound reinforcement for small and medium-size venues
- · Fixed installations in concert halls, theatres, ballrooms and
- HoW
- Sports stadium and arena installations
- Corporate AV events

The scalable resolution of WPS offers greatly improved coverage consistency and control compared to a standard line array and provides a flexible pathway to advanced array control.

WPS is a versatile, state-ot-the-art line array with a peak SPL of 133dB and is designed for small-to-medium scale touring and install applications that require a high output array with reduced weight and footprint. With exemplary coverage consistency and superb sound performance, the flexibility of WPS makes it an ideal system for live sound reinforcement and installations in theatres, concert halls and Houses of Worship. Return-on-investment within a rental company's inventory is maximised by also deploying WPS arrays as front-fill, delay or side-hang support for larger WP systems.

WPS is a passive 3-way system which integrates a high density of drive units in a very compact enclosure. It features 2 x 8" (200mm) LF drivers, 4 x 4" (100mm) midrange drivers and 4 x 1" (25mm) exit HF compression drivers loaded by a moulded HF horn which occupies the full width of the enclosure defining the 100° horizontal constant directivity coverage pattern of both the HF and midrange sections.

The 4" midrange drivers are compression-loaded to raise efficiency and enter the horn walls via annular slots close to the HF throat to sum effectively with the HF wavefront. In the HF section, four 1" exit compression drivers deliver pristine high frequency sound without the harshness and distortion associated with larger format devices.

The 8" LF drivers are set back behind the walls of the HF horn, with a small volume of air in front of each driver increasing the output at the upper end of its operating range. The LF exit apertures are spaced apart horizontally to provide useful LF horizontal pattern control.

For extended low frequency performance, WPS is designed to be partnered with the SXC118 cardioid subwoofer or its flyable variant, the SXCF118.

WPS Optimised Line Array – Three-way, passive line array element

Technical Specifications

| TYPE | Three-way, passive line array element | | |
|------------------------|---|--|--|
| FREQUENCY RESPONSE (5) | 70Hz-18000Hz ± 3dB | | |
| DRIVERS | LF: 2 x 8" (200mm)/2" (50mm) voice coil, long excursion, | | |
| | vented yoke, neodymium magnet drivers | | |
| | MF: 4 x 4" (100mm)/1" (25mm) coil, neodymium magnet | | |
| | drivers, compression loaded | | |
| | HF: 4 x 1" (25mm) exit/1.4" (35mm) HT Polymer diaphragm, | | |
| | neodymium magnet compression drivers | | |
| SYSTEM AMPLIFIER | iKON iK42 | | |
| SYSTEM RESOLUTION | 1 to 3 enclosures per amplifier channel (iK42) | | |
| MAXIMUM SPL (9) | 133dB peak | | |
| NOMINAL IMPEDANCE | 6 ohms | | |
| DISPERSION | 100° horizontal (-6dB), 120° horizontal (-10dB), 10° vertical | | |
| CROSSOVER | 520Hz, 1.6kHz internal passive | | |
| ENCLOSURE | Vertical trapezoid with 5° wall angle, | | |
| | multi-laminate birch and poplar-ply construction | | |
| FINISH | Black textured paint | | |
| PROTECTIVE GRILLE | Black HEX perforated steel | | |
| CONECTORS | 2 x NL4 type | | |
| PIN CONNECTIONS | 1+/1- | | |
| FITTINGS | 3-point rigging system, 2 x side pocket handles | | |
| | 2 x rear grip handles | | |
| FLOWN ARRAY MAXIMUM | 16 enclosures in single array | | |
| DIMENSIONS | (W) 650mm x (H) 261mm x (D) 400mm | | |
| | (W) 25.6in x (H) 10.3in x (D) 15.8in | | |
| WEIGHT | 27kg (60lbs) | | |
| ACCESSORIES | Install flying frame, Touring flying frame, Flying Pin | | |
| | | | |

Trade Descriptions Act

Due to Martin Audio's policy of continuing improvement, we reserve the right to alter these specifications without prior notice. Martin Audio is committed to refining state of the art sound reinforcement, combining in-depth product and field applications research with advanced manufacturing techniques. Every Martin Audio product is built to the highest manufacturing standards and rigorously tested to ensure that it meets the performance criteria specified in the design.

SPL Comparisons Vs Competitors

- The core measurement of SPL is measured differently by manufacturers
- Simply put, many competitors now quote figures based upon a crest factor of 4 (12dB peak vs continuous) and often use the highest sensitivity frequency band (typically HF) to derive their figures given that at LF, where the most power is required, even large amplifiers can't swing twice the peak output volts demanded by a doubling in crest factor from 2 to 4.
- Martin Audio quotes the AES industry standard crest factor of 2 (6dB peak vs continuous) and we ensure our partnering amplifiers are capable of delivering the volts and power to achieve our specs.
- Therefore, if people reading specifications do not understand how SPL is measured and the implicationsit would appear incorrectly that some competitors have significantly higher SPL.
- While absolute comparable data is not available, some element of logic can be applied for the following products to bring a more realistic comparison.

| Product | Peak at Crest factor 2 (6dB) | Peak at Crest factor 4 (12dB) |
|------------------|------------------------------|-------------------------------|
| Martin Audio WPS | 133dB* | 139dB** |
| d&b Y8 | 133dB** | 139dB* |
| JBL VTX A8 | 133dB** | 139dB* |
| L-Acoustics Kara | 135dB** | 141dB* |
